Staff Management

Mobile Application

With multiple methods to create schedules and tools to make schedule management easier, it is a large time and money saver that enables us to contractually guarantee a one-year payback. It allows users to do the following according to user group.

“Comprehensive solution without hurdles of Interfacing”

Managerial Users

- Build and publish a schedule within minutes and make subsequent edits.
- Create and assign an unlimited number of shift rotations.
- Operate without restrictions on shift structures or unit organization requirements.
- Ensure complete compliance with organization regulations.
- Track any changes made in a fully auditable fashion.
- Approve or deny employee requests with ease.
- Automatically notify employees of any changes or needs regarding shifts.
- Find the most suitable employees to cover open shifts with one click.

Staff Level Users

- View their schedule on an easy-to-use personal calendar using a phone or PC
- Easily request shift swaps or changes.
- Show availability or unavailability to work overtime.
- Submit leave requests and see manager actions with ease.
- Bid to work open shifts
- Receive all relevant notifications as per preference, through SMS and/or email
